Installing the Shower Fittings 1. Fit the hose retaining ring and clamp bracket to the middle bar, then screw all three bars together. 2. Fit the wall bracket into the riser arm with the grub screw at the top. 3. Make sure that the lower bar is pushed fully into the valve to engage the seal.

Shower head brackets are a practical and popular accessory suitable for any home. Designed to keep the head in position as well as being adjustable for any user. They are sturdy, robust and durable. Easy to install by either the rail or by being mounted to a wall.

A standard fitting will attach to the existing shower arm with a flexible hose and hand-held shower unit. You can screw the hand-held shower head base onto the arm, attach a flexible hose as you hand tighten it, check it for leaks by turning on the faucet and mount the wall bracket as you follow any manual instructions.

Note: Compared to most other solar pool showers, this unit heats from a base compartment rather than the vertical post. The flat horizontal design of the water-filled compartment gives it good sun exposure for fast heating. In fact, when you put the solar shower out in the sun, the water can heat up significantly in as little as 2 hours.
