

Solar power billboard

What is a solar Billboard light?

SOLTECH's solar billboard lights have an all-in-one design and come complete with a self-contained solar power assembly, sized to run the specified solar fixture wattage. Our BROADWAY provides cost savings by eliminating the need to trench standard electric wires for installation and providing no electric bill for the life of the system.

Why should a Billboard be illuminated by a solar system?

A solar system can save thousands due to eliminating the need for trenching cables, and will also provide an environmentally friendly image for the advertiser and also the billboard company. Solar Illuminations offers many lighting solutions that can illuminate billboards of most sizes and designs.

What is a soltech Billboard lighting system?

SOLTECH billboard lighting systems provide lighting for large and small billboards, entrance signs, building name signs, and other similar items without the need for standard utility power.

Are solar-powered signs a good alternative to a mains power supply?

Many signs are located some distance away from a mains power supply. Therefore using a solar-powered LED sign, billboard or hoarding light system is an ideal solution to this problem and it's also a 'green' alternative to using mains power. All our solar sign light fittings are easy to install, no electrician required!

What is a solar powered sign light system?

This professional, solar powered sign light system includes two 5w or 10w LED light bar fixtures. Ideal for internal or external illumination of monument signs, box signs, cabinet signs, church signs, pylon signs, notice boards etc. The light bar fixtures low profile design enables it to be installed.

Do you need a solar-powered sign system?

For business owners, it's very important to have signage lit during the hours of darkness. Many signs are located some distance away from a mains power supply. Therefore using a solar-powered LED sign, billboard or hoarding light system is an ideal solution to this problem and it's also a 'green' alternative to using mains power.

Like all great pop songs, "Solar Power" is deceptively simple: after a few listens, you notice the saxophone and trumpet snuck into the mix, as well as the barely audible ad-lib "So sorry, I ...
