

# Solar power box scam revealed

What is a solar energy scam?

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer's offer, it could cost you tens of thousands of dollars.

Is electricity saving box a scam?

The Electricity Saving Box scam relies on exaggerated and false claims about its energy-saving capabilities. Here are some of the deceptive tactics used by Electricity Saving Box marketers: The Electricity Saving Box website and ads claim the device "stabilizes your home's electrical current" and fixes voltage fluctuations that waste electricity.

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

Are there any energy scams?

A common energy scam you're likely to come across is a little box, usually about the size of a wall timer, that you simply plug into an electrical outlet (like the "Souwa Power Save, 90V-250V 30KW Electricity Saving Box", available on Amazon). The purveyors of these things claim you'll save 25%, 35%, some say 60% or more on your electric bill.

Are 'fake' solar companies a scam?

Beware of any company asking you to make a big deposit before they have completed their installation. This is one of the most common ways 'fake' solar companies have targeted consumers - whereby they take a hefty deposit and then never turn up to carry out the installation. This is common solar scam.

Are stopwatt 'electricity-saving boxes' a scam?

Scams for these "electricity-saving boxes" usually begin with an online ad displayed on a website or in an email newsletter that claims the compact, inexpensive device can save homeowners 90% off of their utility bill. Those ads then lead to a scammy article that falsely claims Musk created StopWatt.

If you see a deal like this one, it could well be a scam. While solar power is a great investment that can pay for itself in the longer term and federal and state provide support for solar power for some consumers, solar panel installation is usually not free and utility companies are not providing free solar power. ...
