

Solar power chaser

Why should you buy a solar-powered cat repellent?

This feature ensures that your garden stays cat-free for longer periods. The solar-powered design of this cat repellent allows you to save money on batteries and electricity supply, making it an eco-friendly and cost-effective choice. The product recharges during the day using solar energy and can operate for up to seven days on a single charge.

How much does a solar pest repeller cost?

Waterproof: Solar pest repellents are designed for use outdoors, so most are well protected and won't be harmed by inclement weather. Choose rustproof units if you plan to place them in an open area. Most solar pest repellents are sold in packs of two or more. Expect to pay up to \$60 for a package of two or four.

How do solar pest repellents work?

Most solar repellents can detect movement, which then triggers a loud noise, vibrations, or flashing lights to ward off invaders. What distinguishes these devices from other pest repellent devices is the solar panel that helps to power each unit.

What is the difference between a pestbye & a solar powered sensor?

The controls are pretty much identical, with two simple dials controlling the frequency presets and the sensitivity of the sensor, and that's pretty much all there is to it. Child's play to operate, really. Where this product differs from the Pestbye one, is that it is solar powered, and the solar cells will pick up sunlight and charge the batteries.

Can you use a USB charger to charge solar cells?

Now, I know what you are thinking: "solar cells in the British gloomy weather?" and you are right, but Frostfire have thought of that and it is possible to top up the batteries when needed by using a USB charger.

There is no scientific evidence to support the claim that solar-powered mole chasers work. In fact, one study showed that these devices had no effect on moles. The study did find, however, that the devices were effective at scaring away rabbits. So if you're looking for a way to get rid of moles, a solar-powered mole chaser is not your best ...
