

Solar power generation and VAT exemption

What is the VAT exemption on solar panels & battery installations?

As of February 1, 2024, a significant change has illuminated the realm of sustainable energy in the UK--the VAT exemption on solar panel and battery installations. This transformative shift not only promotes the adoption of clean energy solutions, but also brings noteworthy financial benefits to both residential and commercial consumers.

Are solar and energy storage installations subject to VAT?

All solar and energy storage installations, including maintenance to existing sites, should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.

What is 0% VAT on solar panels?

The 0% VAT on solar panels in the UK is a temporary measure, set to last until 31 March 2027. From 1 April 2027 onwards, the VAT rate on solar panel supplies will go back to the reduced rate of 5%, in line with the UK government's financial and renewable energy goals. Does 0% VAT apply to solar batteries?

Are solar panels VAT free?

Whether you're buying a standalone solar battery or getting a battery installed with a solar panel system, you'll benefit from the 0% VAT rate. This rule changed in February 2024 to include standalone storage batteries at the 0% VAT, regardless of whether you're getting solar panels at the same time. Is there VAT on solar panel income?

Are solar panels tax deductible in the UK?

According to the UK government's list of Energy Saving Measures (ESMs), most solar photovoltaic (PV) panels installed on residential properties in Scotland, England and Wales (plus Northern Ireland, as of 1 May 2023) are exempt from VAT, meaning there's no VAT included in the purchase and installation costs.

Are solar thermal and PV systems subject to VAT?

Solar thermal and PV systems are included on the list of ESMs. Their supply and installation are now subject to 0% VAT in Great Britain. In Northern Ireland, the previous rules remain in force. This means that solar is subject to 20% VAT unless a reduced rate of 5% applies.

With VAT exemptions on solar panel and battery installations taking effect from February 1, 2024, the path to a solar-powered future in the UK has become more enticing than ever. Whether for residential tranquillity or commercial innovation, the financial benefits are aligned with the broader goal of building a sustainable and eco-conscious nation.

With VAT exemptions on solar panel and battery installations in effect from February 1, 2024, the journey

Solar power generation and VAT exemption

towards a solar-powered future in the UK is more compelling than ever. Whether for residential tranquillity or commercial innovation, the financial benefits are perfectly aligned with the broader goal of cultivating a sustainable and eco-conscious nation.

The new incentives will benefit off-grid solar providers more as these decentralised solutions are accelerating the electrification in Zimbabwe as well as other countries in Africa. Owing to outdated power generation and ...

This will be in addition to the exemption of import duties on solar power equipment into Zimbabwe.
