This can help identify faults and optimise system performance, by providing an indication of when a system needs investigation by trained and authorised engineers. Monitoring can be performed based on information received at diff

How do you maintain a solar system at a height?

GIZ recommends that only GHS focal persons/certified electrician who have been trained to work at heights conduct all solar system maintenance at height. 1. Clean solar panel with soft cloth or soft mop and water anytime it is dirty. Do this when panels are cool and do not use soap/detergent for cleaning.

Are solar PV systems a micro power plant?
