

Solar power generation is a pyramid scheme

Should India build a solar power plant or a wind farm?

India wants more energy from many sources; it is building coal plants and wind farms (the Adani Group is involved in both) as well as solar farms. Climate diehards argue that it would be better advised to build only solar and wind.

What makes solar energy revolutionary?

What makes solar energy revolutionary is the rate of growth which brought it to this just-beyond-the-marginal state.

How many solar panels are installed on farms a year?

The number of solar panels installed on farms has doubled every year. By 2019 Mr Brittan's team had counted 67,000 solar arrays just in the Helmand valley.

Is the Sun winning energy-generation technology?

"There is no other energy-generation tech where you install 1m or one of the same thing depending on your application," says Rob Carlson, a technology investor; as he puts it in a white paper, "The Sun has won". The key to the way this demand grows is to be found in the industry's "experience curve".

Is DC Solar a Ponzi scheme?

The plan had many of the hallmarks of a classic Ponzi scheme, but with a twist. DC Solar wouldn't just defraud new buyers to pay earlier ones. By holding itself out as a legitimate solar company, it would give all of them--new and old--cover to drain millions of dollars of tax credits from the U.S. Treasury.

How much energy do solar panels produce?

Over the course of 2023 the world's solar cells, their panels currently covering less than 10,000 square kilometres, produced about 1,600 terawatt-hours of energy (a terawatt, or 1 tw, is a trillion watts). That represented about 6% of the electricity generated world wide, and just over 1% of the world's primary-energy use.
