

Solar power generation photovoltaic price quote

How do I compare solar panel prices & quotes?

Here you can compare solar panel prices and solar panel quotes with ease and find lowest cost panels. Simply type your postcode into the box below and select one or many local and national, trusted solar panel installers and ask them for a quotation.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much will solar panels cost in 2016?

From 2016 the rate is expected to drop towards 4.39 pence. (more...) Solar panel prices dropped two-thirds since early 2011. A 4kWp system (16 solar panels) that used to cost £15,000 is currently available from £5,000. On a South-facing roof these panels will pay back about £860 per year, which is a return of 17% on the purchase price. (more...)

How do I get a solar panel quote?

Simply type your postcode into the box below and select one or many local and national, trusted solar panel installers and ask them for a quotation. Using this feature will help ensure you get the best price possible and is design to save you money.

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

Are solar panels worth it in the UK?

Yes, installing solar panels in the UK is worth considering. They provide several benefits including reduced electricity bills, lower carbon emissions, and earnings from excess energy generation. What is more, solar panels pay for themselves in the range of 7 to 10 years on average. How much will 10 solar panels cost in the UK?

With our solar panels, a battery and a preferential rate on our SmartGen+ export tariff, you could reduce your electricity bills by up to 89% every year[2]. And then, if you add our £500 credit offer[1] to this, that could mean your electricity bill could be £0 in the first year.

Also, if your Solar PV panels produce more electricity than you need, the excess can be sold back to the national grid through a Feed In Tariff scheme. Consumers with a typical 3.5kWp Solar PV system could make combined saving and income of £628 per year (based on a solar PV system eligible for a generation
