The solar function means they use the power of the sun to charge the batteries to power the lights when needed. They use a PIR function which senses movement to activate the light, thus only illuminating the area when required. Not only are the PIR solar garden lights good for the environment due to using renewable energy, but they also make ...

Solar lights are powered by internal rechargeable batteries, charged through the day by a solar panel. The brighter the day, the more power is stored by the battery and the longer the light will shine. Light is produced by one or more LEDs; at dusk they turn on automatically, until turning off when the sun comes up. ...
