

Solar support falls off

Will European Solar supply chain companies go bankrupt?

Solar is central to the EU's hopes to generate 45 per cent of its electricity from renewable sources by 2030. Since August, however, eight European solar supply chain companies have either filed for bankruptcy, paused production, warned of factory closures or restructured debts, according to SolarPower Europe.

Will a 'rooftop Revolution' Triple solar power in the UK?

Solar panel installations tripled in the UK thanks to incentives, analysis shows. It's election year in Europe, and with it come big promises - including help for voters in greening their homes. The Labour Party's UK victory heralds a new era for climate action with a "rooftop revolution" aiming to triple solar power in the country by 2030.

How can the solar industry help the UK's farmers?

The solar industry is also working closely with Britain's farmers to reduce their energy costs and improve the sustainability of their operations. To meet the UK government's net zero target, the Climate Change Committee estimates that between 75-90 gigawatts (GW) of solar power will be needed by 2050.

Why have solar panels tripled in the UK?

Subsidies caused solar panel installations to triple in the UK, data shows. - Copyright Canva Solar panel installations tripled in the UK thanks to incentives, analysis shows. It's election year in Europe, and with it come big promises - including help for voters in greening their homes.

Can solar panels save you money?

If you sign up for Smart Export Guarantee payments, solar panels could cut your bills by as much as £600 per year, according to the Energy Saving Trust. The average domestic solar panel system costs around £7,000 to install, meaning it could pay for itself - and even start earning you money - within approximately 12 years.

Why is China facing a Solar Crisis?

The forces behind the crisis are multiple. Chinese solar manufacturing capacity has outpaced domestic demand, particularly as companies have built production lines for new technologies while simultaneously producing older models. This led to record overseas exports in 2023 that far exceeded installations in markets such as Europe.

5m low voltage garden grade Solar cable connects the Pump to the Solar Panel. LED Converter Cable to power feature's lights (5m Long). Solar Pump Kit, including Solar Panel & Fixing Brackets. Integrated batteries for uninterrupted operation, even during spot cloud cover. Operational at night for 3-4 hours on a full charge.
