The best type of solar panel overall is monocrystalline, as it achieves the best peak power output, efficiency ratings, and break-even point, all while looking good. However, perovskite solar panels are coming for its crown. When they're widely available, they'll revolutionise the market - and your electricity bill savings.

This report is the first-ever projection of PV panel waste volumes to 2050. It highlights that recycling or repurposing solar PV panels at the end of their roughly 30-year lifetime can unlock an estimated stock of 78 million tonnes of raw materials and other valuable components globally by 2050.
