What is a solar generator?

The Solar Generator is a block added by Extra Utilities. It produces Redstone Flux (RF) from sunlight. Normal energy output values are up to 40 RF/t in the Overworld and a constant 40 RF/t in The End. However, this generator cannot generate and emit power at the same time, making it more complex than the solar panels from other mods.

How much energy does a generator generate?

Normal energy output values are up to 40 RF/t in the Overworld and a constant 40 RF/t in The End. However, this generator cannot generate and emit power at the same time, making it more complex than the solar panels from other mods. The Generator switches to transmitting power when a Redstone signal is applied.

What is solar energy in Minecraft?

As you know, solar energy is a kind of energy from heat and solar radiation. It is a kind of clean, renewable, and harmless energy to the Earth. In Minecraft, the production of energy does not affect nature. But it takes a certain type of resource to produce energy and that can lead to rapid resource depletion.
