

## Wall-mounted lockers can bear weight

How much weight can a side locker hold?

This side locker is an excellent add-on item for 27-inch and 42-inch cabinets. Featuring one adjustable shelf, full piano hinged door and a keyed lock for added security. Side lockers holds a maximum of 200 lbs. One year limited warranty covers workmanship and manufacturing defects under normal usage.

How big is a bear locker?

The lockers measure 17 inches deep by 49 inches wide by 17 inches high (43 cm x 124 cm x 43 cm). Be sure to keep the locker closed and clipped: a bear may enter your campsite even in your presence. Was this page helpful?

How much weight can a single wall unit hold?

A single wall unit, and food can be 30-40kg. They get hung on partition walls, several of them. That will be an awful lot of weight and all on one side of the wall, I would suggest it would be OK if there were a similar amount of weight on the other side to counterbalance it.

Are wall mount shelves a limiting factor?

A limiting factor of wall mount shelves is their depth. This answer might help you figure out whether you need free-standing shelving or whether you can wall mount. I'd always go for fixings that are slightly more beefy than I think I need just to be safe. Your Answer Thanks for contributing an answer to Home Improvement Stack Exchange!

Can a server rack be wall mounted?

Server rack could still be wall mounted but the shelf would take the bulk of the load. or the floor. The deeper the load placed on the wall, the greater the leverage on that wall. 30kg at one foot out, will exert a leverage of 60kg at two feet out from the wall.

How much weight can a 2x4 stud wall withstand?

You would have to have quite an elaborate mounting system to actually cause a 2x4 stud wall to buckle before the fasteners failed. According to this [1/2" lag screw into a stud should withstand 230lbs](#). Suppose you have 2 screws per 2x4 and your studs are on 16" centers. That give a theoretical load capacity of 345lbs per horizontal linear foot.

The Wall Mounted Dryers are non enclosed dryers designed to be wall mounted for easy access by all employees. If the wall structure is not suitable then an optional stand is available to bear the weight of the dryer but it is still recommended that the dryer be attached to the wall to prevent any instability in use.

There's a couple of items I'd like to fix to the wall inside the utility room but due to layout constraints, I can only put them on a stud partition wall. The wall is about 230cm wide ...
