What are bar counters for restaurants?

Bar counters for restaurants come in a variety of designs. Unlike chairs and tables that come in a range of standard designs, restaurant counters are much more individualistic. Their design reflects the decor and styling requirements of the space &/or the owner / interior designers imperatives. So it is difficult to pin them down, design-wise.

What are the different types of bar counters?

Single-fronted or straight bar counters are the most common types found in restaurants. They allow customers to sit in a straight line allowing the bartender to serve them efficiently. 2. Double-Fronted Counter

What is a custom bar counter?

Custom bar counters can be designed in any shape or form. Such bar counters optimize space irrespective of layout since they can be designed to go around pillars or fixed sections of a building which would otherwise go cause disruptions in seating and waste available space in a restaurant. 1. MODERN RESTAURANT COUNTERS

What are the different types of counters used at restaurants and cafes?

Counters used at restaurants and cafes can be broadly classified into the following: Bar Counters are often found just outside the kitchen and are used to serve food and drinks sitting at the opposite side of it or to waiters to be distributed onwards to diners sitting in the restaurant seating area.

What is a serving counter & bar counter?

They also double up as ice stations, cash counters and food or drinks storage units. A bar counter can also divide the cooking area and the eating area and act as a transition area to receive food preparations from kitchen and serve it up to diners. Not only do serving counters and bar counters help maximize seating space

What is a restaurant service counter?

Restaurant Service Counters usually refer to either one of self-service counters at fast-food or QSR chains. Alternatively, they can also refer to cash counters or waitress stations, concierge desks or a combination thereof. Bar Counters vs. Kitchen Counters Bar counters are different from kitchen counters.
