

Wind blade generator price inquiry

How much does a wind turbine generator cost?

Versatile generator for use as both a wind turbine and a portable hand-powered device. This purchase includes the generator with a built-in charge controller; the turbine blade set is sold separately as a two-for-one deal for GBP 299. Prepare for a dose of innovation! Your delivery includes one sleek box containing the wind turbine generator.

How much does a commercial wind turbine cost?

Buying and installing a commercial wind turbine could cost anywhere from £345,000 for a 100 kW turbine, to £3.13 million for a 3.5 MW turbine. Usually, the bigger the turbine, the less you pay per kW. Forking out the initial outlay for a wind turbine can be challenging, but there are ways to make it easier.

How can I compare wind turbine prices UK online?

You now have the opportunity to compare wind turbine prices UK online with our installer and manufacturer data base. It allows you to put in your post code and find out where the best in the business are located in your area.

How much does a roof-mounted wind turbine cost?

A roof-mounted turbine could be a good option if you have a high roof that regularly gets enough wind speed. The average cost of a roof-mounted domestic wind turbine is £2,000. These turbines are generally cheaper and easier to install than freestanding wind turbines. However, they're typically small, varying in power from around 0.5 to 2.5 kW.

How much does a freestanding wind turbine cost?

Freestanding wind turbines are more expensive to install, but they're much more effective if you're serious about going fully renewable or perhaps even benefitting from the Feed-in Tariff. Prices vary from around £7,000 for a 1.5 kW freestanding wind turbine to around £70,000 for a 15 kW one.

How long do wind turbines last?

Since they rely on relatively simple mechanical processes, the turbines themselves tend to have a long life, and typically come with a service warranty period of 10-20 years. If the wind turbine system contains batteries for the storage of the electricity generated, these will probably need to be replaced around every 5 to 10 years.

Our product range includes Off-grid Wind Power Systems with 1kW, 1.6kW, and 2kW wind turbines, each paired with Off-Grid Wind Charge Controllers, and Lithium/AGM Battery Banks of 6.0kWh, 8.4kWh, and 11.0kWh, along with ...
