

# Zhengxin photovoltaic panel price

When will Chinese solar panel prices be based on PERC?

Prices for Chinese project will be prices for TOPCon modules instead of PERC from April 2024 onwards. InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

How does pvxchange differentiate between the main technologies available on the market?

In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary.

Does pvxchange offer a price index?

Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary. Please find here a collection of all available market comments: [Market Analysis](#)

How many solar panels will China install in 2023?

According to the China Photovoltaic Industry Association, the country is set to install up to 120 GW of solar power in 2023. But manufacturers should have big module inventories accumulating, noted another source, which if unleashed on the market may suggest more downslides on the horizon.

Could China's 'all-time high' solar power supply cause a price drop?

Pent-up demand from what one source calls "all-time high" procurement, with China's National Energy Administration approving a third batch of Gigawatt-base power projects, means falling prices could find a floor. According to the China Photovoltaic Industry Association, the country is set to install up to 120 GW of solar power in 2023.

Will China module prices fall?

Buyers will wait as long as their project allows them to do so, explained one veteran market observer, adding that he did not expect falling module prices to level off. OPIS expects significant price volatility ahead as buyers and sellers alike adopt a wait-and-see approach to the China module market's direction.
